

Deep Energy Retrofit

Sign up Form

By signing this form, you agree to

- Participate in the energy assessment, planning and screening process to determine if your home is a candidate for the deep energy retrofit project.
- Allow the project team to access information about your home’s current energy use with an in-home energy assessment and by providing copies of your utility bills.
- Allow workers to access your home to install energy sensors and conduct an energy assessment that includes in-home tests to determine your home’s suitability for upgrades.

House Address and Your Contact Information

Address of home to be retrofitted (# and Street): _____

First Name: _____ Last Name: _____

Phone number: _____ Cell: _____

Email: _____

Tenant Consent

I agree to participate in the deep energy retrofit project for my home. I understand that the information collected about my home’s energy use will be kept confidential and will not be shared with anyone beyond the project.

First and Last Name (print): _____

Signature: _____ Date: _____

KDFN Community Services Representative

First and Last Name (print): _____

Signature: _____ Date: _____

Thank you for being part of this important project!
Together, we can create more comfortable,
energy-efficient homes for our community.

Deep Energy Retrofit Q&A

Q: Who is leading this project?

KDFN Community Services has partnered with local deep energy retrofit specialists, Earthrise Building Services. Together, they comprise the project team leading this initiative in the KDFN community.

Q: Will the upgrades increase my power bill?

A: We understand concerns about rising power bills. However, with the deep energy retrofits, your heating fuel bill will be eliminated! While electricity use and cost will increase, your fuel bill will be eliminated completely, resulting in lower overall energy costs, meaning you'll save money in the long run. If you have any questions, we're happy to help explain how the savings add up!

Q: Will signing up for the KDFN deep energy retrofit project cost me anything?

A: No, there is no cost to tenants. The Greener Neighbourhoods Pilot Program and other funding will cover the cost of these upgrades.

Q: How long will the work take?

A: Once funding is secured and your home is scheduled, the project team will inform you when work starts. Timing depends on the improvements, but they'll work efficiently and keep you updated. The 100 homes will be completed within a 3-year timeline.

Q: Will I have to leave my home during the retrofit?

A: The work can be done while you are still living in your home. If any major work needs to be done that would cause disruption, the contractors will let you know ahead of time. The goal is to keep things as smooth as possible for you.

Q: What happens after the retrofit is complete?

A: Earthrise will show you how to use and maintain the new systems in your home, and you'll start seeing the savings on your energy bills right away.

Q: How do I get my home included in the project?

A: You just need to sign a consent form indicating that you're interested in having your home retrofitted. The project team will then assess your home and create a plan.

Thank you for being part of this important project!
Together, we can create more comfortable,
energy-efficient homes for our community.
